

RESOLUTION 2021 08

ENVIRONMENTAL AWARENESS

WHEREAS Climate Change is now the critical issue for the future of our children, and the Government of Quebec and the Government of Canada are scrambling to meet their 2030 and 2050 emission reduction targets; and

WHEREAS the Federal Government has tabled legislation (Bill C-12) that would oblige current and future Federal governments to set binding climate targets to get Canada to net-zero carbon emissions by 2050; and

WHEREAS the Quebec Government has committed to meeting the emissions target set by the previous government: a 37.5-per cent reduction from 1990 levels by 2030; and

WHEREAS plastic items are choking our oceans and waterways.

THEREFORE, BE IT RESOLVED that the Quebec Federation of Home and School Associations Inc. promotes environmental awareness by strongly recommending that all Home and School associations consider the environmental impact of their fundraising and activities:

- by sourcing environmentally friendly products for fundraising,
- by recycling and composting all items (leftover food and packaging), and
- by reducing and eventually eliminating all single use plastics from all their activities.
